11th November 2016

ATEX DIRECTIVE STATEMENT OF EXEMPTION

Issued in accordance with 2014/34/EU – Equipment and protective systems
intended for use in potentially explosive atmospheres

Pressure Tech Ltd declares that the products listed below (in series) are manufactured in accordance with ISO 9001 and have been internally assessed against the requirements of the ATEX directive 2014/34/EU. As they are not intended for use in potentially explosive areas and on the basis that pressure regulators are 'simple' mechanical products with no source of ignition* it is hereby confirmed that these products fall outside the scope of the directive:

ACS-300/310	LF-230/240
ACU-300/310	LF-300/310
BP-010	LF-301/311
BP-300	LF-540
BP-301	LF-550
BP-HF250/251	LF-690/691/692
BP-HF300/301	LGC-690
BP-HF691	MINI-300/310
BP-LF540	MINI-301
BP-LF/MF-690 (0.1/0.5 Cv)	MF-101/101T
BP-MF690 (1.5 Cv)	MF-230/231
CYL-300/301/540	MF-300/301
HF-210/211	MF-400/401
HF-250/251	MF-414
HF-300/301	SS-414 / SS-690
HYD-690/691	TS-300

*It is considered that the relative contact speed of any moving part of the equipment is significantly lower than 1 ms^{-1} and as such, any friction would be insufficient to generate heat and sparks that could ignite a potentially explosive atmosphere.

Signed:

Keith O'Pray
