INTRODUCING THE HF300...

The HF300 is a non-venting diaphragm-sensed high-flow pressure regulator for gas or liquid applications with a **balanced main valve** design as standard. The liquid version includes a Vespe^l® seat, whilst the gas version features PEEK[™] seating. The HF300 provides stable control with a high level of accuracy under varying inlet pressures.

An unbalanced option can be offered alternatively for applications with maximum inlet pressures of up to 50 bar (725 psi).
