AUTO-CHANGEOVER SYSTEM

Gas Liquid | Diaphragm Piston | Self-Venting Non-Venting | Max Inlet: 300 bar (4,350 psi) | Max Outlet: 20 bar (290 psi) | Cv 0.06

INTRODUCING THE ACS310...

The ACS310 auto-changeover system provides a continual supply of gas, ideal for applications such as in medical or laboratory processes where a continual supply of gas is essential.

Upon depletion of one bank, the other automatically cuts in. A quick switch of the lever ensures the supply is reset to its original value. An optional second stage regulator prevents fluctuations in supply pressure.

The ACS310 incorporates the LF310 regulator with a solid disk type main valve assembly - further details may be found on the LF310 datasheet. It is also supplied as standard with two flexible inlet connection hoses (1/4" NPT connection and 1 metre length).

SPECIFICATION

Max. Rated Inlet Pressure	300 bar (4,350 psi)
Outlet Ranges	Up to 20 bar (290 psi)
Design Proof Pressure	150% max. working pressure
